EXPLANATORY NOTES

1. In all the tables of exports in this Report, the quantities and values are based upon the declarations of exporters (export entries), as subsequently checked by Customs officials.
2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Gas engines and parts", which show both quantities and values. In the item "Gas engines and parts" the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.
6. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.
7. "Exports of Foreign Produce" consist of commodities which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.
8. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods are intended to pass, without interruption of transit, except in the course of transshipment or transfer from one means of conveyance to another.
9. The initials "N.O.P." mean "not otherwise provided for".
10. Some of the descriptions of articles used in this Report are abbreviated and incomplete, due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed Report of the Trade of Canada.
11. Throughout this Report, figures are subject to revision.
12. The Foreign Trade of Newfoundland is included as from April 1, 1949.

The following table sets out index number comparisons of the nominal (or declared) values of exports of Canadian produce from Canada together with their respective price and volume components for a current month.(1) The price indexes are of the base-weighted aggregative type and are interim measurements developed as deflators of the value series.(2) The physical volume indexes are quotients of a division of value indexes by corresponding price indexes. They are currently weighted.

The price indexes utilized as "deflators" of the value indexes differ slightly from the conventional trade statistics in their grouping, though arranged by nature of component material. Adjustments to groups are determined by pricing problems. Declared value indexes and physical volume indexes have been grouped, consequently, according to the price index sample.

The groups usually designated in trade statistics as agricultural and vegetable products and animal products have, in this format, been combined into Group I, agricultural and other primary products, with a sub-group of rubber and its products transferred to the miscellaneous group. Exports of ships sold to other countries have been transferred from the miscellaneous group to iron and steel and their products. Other adjustments are minor in these post-war based computations. Totals exclude-in common with other statistics of Canadian produce exported from Canada - temporary exports for exhibition or competition, monetary and non-monetary gold; and include Newfoundland as a tenth Canadian province from April, 1949.

A sub-division of the miscellaneous group, termed special and non-commercial transactions, is designed to distinguish unilateral transactions - such as donations and gifts - and transactions with mixed financial elements from the ordinary trade content. The double character of the miscellaneous group of trade transactions is thus emphasised. The special and non-commercial exports concerned are as follows: settlers effects; donations and gifts; contractors' outfits; and motion picture films.

 VALUE AND VOLUME at end of report	

EXPLANATORY NOTES

1. In all the tables of exports in this Report, the quantities and values are based upon the declarations of exporters (export entries), as subsequently checked by Customs officials.
2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Gas engines and parts", which show both quantities and values. In the item "Gas engines and parts" the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.
6. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.
7. "Exports of Foreign Produce" consist of commodities which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.
8. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods are intended to pass, without interruption of transit, except in the course of transshipment or transfer from one means of conveyance to another.
9. The initials "N.O.P." mean "not otherwise provided for".
10. Some of the descriptions of articles used in this Report are abbreviated and incomplete, due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed Report of the Trade of Canada.
11. Throughout this Report, figures are subject to revision.
12. The Foreign Trade of Newfoundland is included as from April 1, 1949.

The following table sets out index number comparisons of the nominal (or declared) values of exports of Canadian produce from Canada together with their respective price and volume components for a current month.(1) The price indexes are of the base-weighted aggregative type and are interim measurements developed as deflators of the value series.(2) The physical volume indexes are quotients of a division of value indexes by corresponding price indexes. They are currently weighted.

The price indexes utilized as "deflators" of the value indexes differ slightly from the conventional trade statistics in their grouping, though arranged by nature of component material. Adjustments to groups are determined by pricing problems. Declared value indexes and physical volume indexes have been grouped, consequently, according to the price index sample.

The groups usually designated in trade statistics as agricultural and vegetable products and animal products have, in this format, been combined into Group I, agricultural and other primary products, with a sub-group of rubber and its products transferred to the miscellaneous group. Exports of ships sold to other countries have been transferred from the miscellaneous group to iron and steel and their products. Other adjustments are minor in these post-war based computations. Totals exclude-in common with other statistics of Canadian produce exported from Canada - temporary exports for exhibition or competition, monetary and non-monetary gold; and include Newfoundland as a tenth Canadian province from April, 1949.

A sub-division of the miscellaneous group, termed special and non-commercial transactions, is designed to distinguish unilateral transactions - such as donations and gifts - and transactions with mixed financial elements from the ordinary trade content. The double character of the miscellaneous group of trade transactions is thus emphasised. The special and non-commercial exports concerned are as follows: settlers effects; donations and gifts; contractors' outfits; and motion picture films.

VALUE AND VOLUME at end of report

EXPLANATORY NOTES

1. In all the tables of exports in this Report, the quantities and values are based upon the declarations of exporters (export entries), as subsequently checked by Customs officials.
2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Gas engines and parts", which show both quantities and values. In the item "Gas engines and parts" the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.
6. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.
7. "Exports of Foreign Produce" consist of commodities which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.
8. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods are intended to pass, without interruption of transit, except in the course of transshipment or transfer from one means of conveyance to another.
9. The initials "N.O.P." mean "not otherwise provided for".
10. Some of the descriptions of articles used in this Report are abbreviated and incomplete, due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed Report of the Trade of Canada.
11. Throughout this Report, figures are subject to revision.
12. The Foreign Trade of Newfoundland is included as from April 1, 1949.

The following table sets out index number comparisons of the nominal (or declared) values of exports of Canadian produce from Canada together with their respective price and volume components for a current month.(1) The price indexes are of the base-weighted aggregative type and are interim measurements developed as deflators of the value series.(2) The physical volume indexes are quotients of a division of value indexes by corresponding price indexes. They are currently weighted.

The price indexes utilized as "deflators" of the value indexes differ slightly from the conventional trade statistics in their grouping, though arranged by nature of component material. Adjustments to groups are determined by pricing problems. Declared value indexes and physical volume indexes have been grouped, consequently, according to the price index sample.

The groups usually designated in trade statistics as agricultural and vegetable products and animal products have, in this format, been combined into Group I, agricultural and other primary products, with a sub-group of rubber and its products transferred to the miscellaneous group. Exports of ships sold to other countries have been transferred from the miscellaneous group to iron and steel and their products. Other adjustments are minor in these post-war based computations. Totals exclude-in common with other statistics of Canadian produce exported from Canada - temporary exports for exhibition or competition, monetary and non-monetary gold; and include Newfoundland as a tenth Canadian province from April, 1949.

A sub-division of the miscellaneous group, termed special and non-commercial transactions, is designed to distinguish unilateral transactions - such as donations and gifts - and transactions with mixed financial elements from the ordinary trade content. The double character of the miscellaneous group of trade transactions is thus emphasised. The special and non-commercial exports concerned are as follows: settlers effects; donations and gifts; contractors' outfits; and motion picture films.

VALUE AND VOLUME at end of report

EXPLANATORY NOTES

1. In all the tables of exports in this Report, the quantities and values are based upon the declarations of exporters (export entries), as subsequently checked by Customs officials.
2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.
3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.
4. In this Report are trade items such as "Gas engines and parts", which show both quantities and values. In the item "Gas engines and parts" the quantity represents the number of complete gas engines only, while the value represents not only the value of the specified number of complete gas engines but also the value of all kinds of "Parts" of gas engines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.
5. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.
6. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.
7. "Exports of Foreign Produce" consist of commodities which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.
8. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods are intended to pass, without interruption of transit, except in the course of transshipment or transfer from one means of conveyance to another.
9. The initials "N.O.P." mean "not otherwise provided for".
10. Some of the descriptions of articles used in this Report are abbreviated and incomplete, due to lack of space and mechanical limitations. Full descriptions are shown in the annual printed Report of the Trade of Canada.
11. Throughout this Report, figures are subject to revision.
12. The Foreign Trade of Newfoundland is included as from April 1, 1949.

The following table sets out index number comparisons of the nominal (or declared) values of exports of Canadian produce from Canada together with their respective price and volume components for a current month. (1) The price indexes are of the base-weighted aggregative type and are interim measurements developed as deflators of the value series. (2) The physical volume indexes are quotients of a division of value indexes by corresponding price indexes. They are currently weighted.

The price indexes utilized as "deflators" of the value indexes differ slightly from the conventional trade statistics in their grouping, though arranged by nature of component material. Adjustments to groups are determined by pricing problems. Declared value indexes and physical volume indexes have been grouped, consequently, according to the price index sample.

The groups usually designated in trade statistics as agricultural and vegetable products and animal products have, in this format, been combined into Group I, agricultural and other primary products, with a sub-group of rubber and its products transferred to the miscellaneous group. Exports of ships sold to other countries have been transferred from the miscellaneous group to iron and steel and their products. Other adjustments are minor in these post-war based computations. Totals exclude-in common with other statistics of Canadian produce exported from Canada - temporary exports for exhibition or competition, monetary and non-monetary gold; and include Newfoundland as a tenth Canadian province from April, 1949.

A sub-division of the miscellaneous group, termed special and non-commercial transactions, is designed to distinguish unilateral transactions - such as donations and gifts - and transactions with mixed financial elements from the ordinary trade content. The double character of the miscellaneous group of trade transactions is thus emphasised. The special and non-commercial exports concerned are as follows: settlers effects; donations and gifts; contractors' outfits; and motion picture films.
